

Name: _____

Identify Survival and Behavioral Adaptations of Animals at the Izaak Walton Park

SOL 3.4

A **behavioral adaptation** is the way a living thing acts in different situations.

1) What is an instinct?

2) How is instinct different from learned behavior?

3) When do animals hibernate?

4) How are hibernation and migration similar? How are they different?

5) How can mimicry protect an animal from other animals?
